

## **SMOKING.....YOUR CONSIDERATION IS REQUESTED**

**Medical authorities have determined that both smoking and second hand smoke exposure can cause significant illness and disease.**

**Our building is designed to be compact and our living areas are in close proximity to our neighbors.**

**Our lanai's are not sealed, and the air current can flow directly from one lanai to another without much breeze needed.**

**The board receives many complaints of second hand smoke interfering with the enjoyment and safe use of lanai space.**

**The board asks you help in eliminating the use of tobacco products on the lanai's and other common spaces that could contribute to the production of second hand smoke.**

**If we all work together on this and are sensitive to others we can continue to have an enjoyable living experience at Princeton Place 5.**
